XK19 Command Center allows fast & easy access to a large number. The following is a list of typical features and functions support by the X-19 controller:

Note: Some indoor models may not support specific system features or functions.
Always refer to the indoor unit Owner's Manual for a complete list of feature and functions.

On/Off - The On/Off button allows you to start and stop the system.

Operating Mode - Allows users to select an operating mode (i.e. Cooling, Heating, Dry, and Fan Only).

Fan Speed - The indoor fan (i.e. High, Medium, Low & Auto) can be adjusted for peak comfort and quietness.

Room Setpoint – Adjust room setpoint temperature between 61 deg F to 86 deg F (16 ~ 30 range).

Timer Mode - Program a One time period (i.e. 0.5-24 hr.) to which the system will turn ON or OFF.

Sleep Mode – Automatically adjust room temperature during your sleep time (i.e. 0.5-24 hr. range).

Turbo Mode – Turbo will force system to run at higher speeds to reach the desired room temperature faster.

X-Fan Mode - Removes moisture build up on coil when the system is turned OFF to prevent mold and mildew.

Privacy Lock - Privacy Lock to prevent unauthorized access to the controls and tampering with system settings.
